

# COST TO OPERATE

## Estimated Pre and Post Annual Cost to Operate Walk-in Coolers Across the US

Pre-numbers are based on semi-hermetic compressors and evaporators using shaded pole fan motors. Post numbers are based on the same semi-hermetic compressor but the evaporator has been changed to **The Reihl Coil** evaporator. Your walk-in cooler cost will vary depending on product load, usage, ambient temperatures and conditions. Energy cost was based on \$0.10 per KWH.
