

Gatekeeper Systems' product suite of intelligent cart solutions offers retailers innovative technology for stores to minimize merchandise loss and reduce asset and labor expenditures.

Cart Containment

Shopping cart loss poses a significant threat to your bottom line. Retrieval, repair, and replacement costs add up to a substantial drain on revenue. Inventory shortages affect customer satisfaction and stray carts create a nuisance for the surrounding community in addition to posing serious liability risks. Gatekeeper Systems' CartControl® shopping cart containment solutions keep shopping carts where you want them.

CartControl®

Outdoors or indoors, cart containment solutions utilizing locking wheel technology prevent carts from rolling off property. When shoppers attempt to take a cart off of your property, wheel will lock when it reaches the signal transmitted by the installed lock line, preventing the cart from moving.

- Gatekeeper Systems is the **only** cart containment solution that houses all electronics inside the wheel, preventing the risk of dirt or debris from inhibiting the wheel from locking.
- Gatekeeper's standard-size wheel fits virtually any cart.
- Totally wireless reset means no bending, no lifting, and **NO HASSLE!**
- **NEW!** SmartWheel® 2.0QS Locking Shopping Cart Wheel is compatible with CartControl cart containment and purchek® loss prevention and offers a **5 year battery warranty**, unmatched by any other on the market.
